M. T. YOUNG

800 SOUTH LINCOLN STREET

TALLULAH, LOUISIANA

PLEASE READ CAREFULLY

Daylilies will grow in either full sun or light shade. To do their best they should have full sun for ½ day or more. Do not judge a daylily by the first year's bloom since 2 years or more are really needed to show what it will do. First year flowers will not be up to par in size, color, height or branching.

Plant about 2 feet apart. Place crowns one inch deep (crown is where the stalk joins the roots). Plant in good well worked soil, with some complete fertilizer or well rotted manure added several weeks before planting. Do not feed with commercial fertilizer in the fall. They are permanent plants and will not need dividing for 10 years or more.

Guarantee—All daylilies are guaranteed true to name and of the finest quality, but no responsibility can be undertaken as to their growing, as this depends on care and local conditions.

Terms—Cash with order. Send money order or check. Postage paid on orders for \$5.00 or more. For orders less than \$5.00 please add 50 cents for postage and packing.

Stock is limited in some varieties, but no substitutions will be made unless a substitute list is sent.

Shipping Season—March 1 to November 1 (also to Gulf Coast area in January and February).

Premium Offers—On varieties selected from this list I make the following offer (collection offers are not eligible):

For orders of \$10.00 or over choose 20% extra value.

For orders of \$25.00 or over choose 35% extra value.

For orders of \$50.00 or over choose 50% extra value.

These premium offers are allowed only as extra plants and do not apply to collection offers or wholesale prices.

DAYLILIES

The blooming season for each variety is indicated by the following code: E—early, EM—early midseason, M—midseason, ML—late midseason, L—late, D—dormant, Ev.—Evergreen, N—night bloomer. Height in inches follows name.
